

# LAKE COUNTRY CHRISTIAN SCHOOL

## Elementary Differentiated Instruction

The elementary staff works hard to ensure that all students at all levels are given the opportunity for success. Several avenues toward this are:

- Eagle Lab
- Academic Language Therapy
- ASPIRE Program

### **Eagle Lab**

Eagle Lab is an enrichment program for elementary school students designed to meet the needs of learners who demonstrate a desire to “think outside of the box.” Classes offer students the opportunity to directly learn more critical thinking and creative problem solving skills while gaining an understanding of personal learning styles. The following are key components to the classes:

- Independent research and learning
- Cooperative learning
- Infusion of technology
- High-interest topics
- Incorporation of teaching across the curriculum in all areas including math, science, reading/language (reading, writing, listening, speaking) and the arts

The cost for Eagle Lab is in addition to regular student tuition and fees. Students may choose to participate in the fall, spring or both semesters.

### **Academic Language Therapy**

Academic Language Therapy is offered to those students whose educational diagnostic testing indicates a need to learn phonics/reading in a different way. Our certified Academic Language Therapist works with extremely small groups of students four times weekly.

The cost for Academic Language Therapy is in addition to student tuition and fees.

### **ASPIRE Program**

The ASPIRE Program is provided to students whose educational diagnostic testing indicates a need to learn using specific 504 accommodations. A conference with student, parent, a teacher, and a representative of the administration will be scheduled to document the approved accommodations for each student, based upon their individual needs.

The cost for ASPIRE is in addition to student tuition and fees.
