

"Alpine is committed to keeping you and your environment safe!"

Alpine Building Maintenance wants to wish your student(s) an amazing school year! Along with your school, Alpine Building Maintenance is taking all the steps necessary to make sure your school stays germ free! As well as keeping you, the parent, informed about the steps that are being taken on a daily basis.

Your school will be disinfected and sterilized regularly with Electrostatic Spray and UV-C Lights. These methods kill 99.9% of germs and bacteria. High germ surfaces such as handles, water fountains, and restrooms will be given special attention while spraying the entire school.

Alpine uses hospital grade disinfectants that kill 99.9% of all germs. Surfaces are wiped down with clean rags, multiple times, to ensure the killing of all germs. All surfaces and high contact areas are sprayed each night with disinfectant and allowed to set for 5-7 minutes. Those areas are then wiped with microfiber rags by custodians wearing gloves. Rags are washed nightly and replaced as needed.

Custodians have gone through a CDC six-step Guideline Program on the correct procedures to make sure they are cleaning surfaces correctly.

With the joint efforts of your school and Alpine Building Maintenance, we are committed to creating a clean, germ free school. If you have any questions, concerns or need anything, please let us know.
